

Dear New England Cytometry members,

The Yale School of Medicine Flow Cytometry Core has a job opening for a Cell Sorter Operator.

Yale is well-known for its leading immunology, cell biology, pharmacology and cancer research. The research environment is very vibrant. Our facility is well-developed with over 800 active registered users from among 200 different labs. The facility is comprised of 7 sorters, 11 analyzers including an Amnis Imagestream X. There are currently six employees and we continue to grow. Please see our website for more details: <https://medicine.yale.edu/immuno/flowcore/>

This is a management position at a Biotechnology Associate I level. We are looking for candidates with substantial flow experience and hands-on sorting experience. The qualified candidate will operate and maintain a FACS Aria cell sorter as well as maintain analytic flow cytometers. Responsibilities include advising facility users on experimental design and troubleshooting data acquisition issues.

Qualified applicants should send a resume and describe your interest in a short email directly to me. You must be qualified to work in the USA.

Ann Haberman, PhD
